NeurIPS figure layout examples

These two figures were generated by `figspec` for the official NeurIPS 2026 single-column template. Both are included at their natural size, without a width argument.

Single-column layout. The figure uses 48% of the text width (190.8 pt, 2.64 in). Labels and legends are 8 pt, ticks 7 pt, and panel titles 9 pt.

Double-column layout. The figure uses the full text width (397.5 pt, 5.50 in), with the same font hierarchy. Both PDFs are at their final size; no scaling is applied when they are included.
